Nouan le Fuzelier, le 12 juin 2006

**Subject: RoHS / WEE Certificate**  
**Field of application of the n°2005-829 decree published the 22/07/2005:**  
**Exclusion of wiring and assembly equipment for electric installation**

Dear Madam, Sir,

In accordance with WEEE directives (2002/96/CE) related to the end of life of electrical and electronic components and RoHS (2002/95/CE) related to dangerous substances limitation, the n° 2005-829 decree of July 20th, 2005:

- Establishes a new organisational and financial framework to ensure waste disposal of electrical and electronic components in the respect of the environment
- Impose since design phase, the restriction of use of certain dangerous substances in some of these equipments that will be introduced into the market as from July 1st, 2006.

**After a rigorous examination of this decree field of application, it's turned out that the whole wiring and assembly equipment and accessories for electrical installation marketed by CAPRI-CODEC SAS is clearly excluded from this new regulation perimeter (see hereafter table).**

| Marketed products   | WEEE | RoHS <sup>1</sup> | Reasons for exclusion   |
|---|------|-------------------|---|
| <b>Boxes and enclosures for electrical accessories</b><br>(standard NF EN 60670)                        | No   | No                | Do not appear in any of the 10 categories of EEE aimed by the texts (cf decree appendix 1)<br><br>Do not work through electrical power or electromagnetic fields (cf decree appendix 1) |
| <b>Devices for the connection of Luminaires; DCL Outlet, DCL plug, DCL Lampholder</b><br>(UTE C 61 390) | No   | No                |   |
| <b>Connecting devices</b><br>(standard EN 60998)  | No   | No                |   |
| <b>Conduit systems for cable management</b><br>(standard NF EN 61386)                                   | No   | No                |   |
| <b>Industrial and ATEX Cable Glands</b><br>(standards NF EN 50262 & 50014)                              | No   | No                |   |

This unambiguous report was established in close cooperation with relevant authorities (Environment & Durable Development Ministry and Economy & Finance Ministry), by the unions of Domergie and Sycacel to which our Company adheres<sup>2</sup>.  
It rests on 3 stable and recognized elements:

- Criteria of exclusion formally registered in the WEEE Directive texts and transposition decree,
- The product list appearing in the annexe of the WEEE Directive and accurately taken again in French law in the decree appendix and in the MEDD opinion published in the JORF 26/10/2005,
- The Community nomenclatures on which French authorities rely to specify the regulation application field and which objectively informs about the content of the product categories concerned.

However, CAPRI-CODEC SAS is concerned about preserving environment. It commits beyond the lawful requirements, by guaranteeing that all the products marketed by CAPRI-CODEC SAS respect the requirements of the RoHS Directive.

These voluntary steps are part of a more global policy started by our company a long time ago, in order to integrate environmental protection in our production processes. As testified by the successful implementation of ISO 14001 environmental management policy in our Nouan-le-Fuzelier production site.

Thank you for the confidence you grant us.

Yours sincerely,

F.OKON  
General Manager

<sup>1</sup> We draw your attention to the fact that some of our products can – in rare situations - be bought by a finished EEE manufacturer, concerned by dangerous substances restriction, in order to be incorporated as subset or component (ei: wiring protection system in a slot-machine). In this particular case, our company commits to provide this company with components compliant with dangerous substances restriction requirements, so that it can satisfy its obligations.

<sup>2</sup> Domergie: Group of industrials of installation switchgear and its house automations applications  
Sycacel: trade union of manufacturers of protection and the support of wiring harness and communication equipment
