

TEPEX

make your work surroundings safer

About us

TEPEX is a regional leader in manufacturing of explosion-protected electrical equipment. Through continuous development of new products and markets, modernization of technology and investment in company employees and organization, we continue the tradition of more than 60 years of experience in the field.

Long-term company policy relies on our people and delivery of innovative products from our own development teams. Aiming for excellence is for us one of the most important corporate values. Our products are intended for use in potentially explosive atmospheres of gases, vapors and dust in industries such as refineries, offshore installations, petrochemical industry, chemical industry, pharmaceutical industry, food processing, shipbuilding and underground mining.

The production program includes Ex light fittings, Ex installation material and accessories, Ex control units, Ex signal devices, Ex terminals, Ex distribution cabinets up to 630 V and 500 A.

In accordance with national regulative, all of our products and systems for quality assurance are certified by an authorized certification institution in the Republic of Croatia –Ex Agency. At European level, the certification was carried out according to the **ATEX Directive 2014/34/EU** by an authorized certification notified body CESI and Ex Agency.

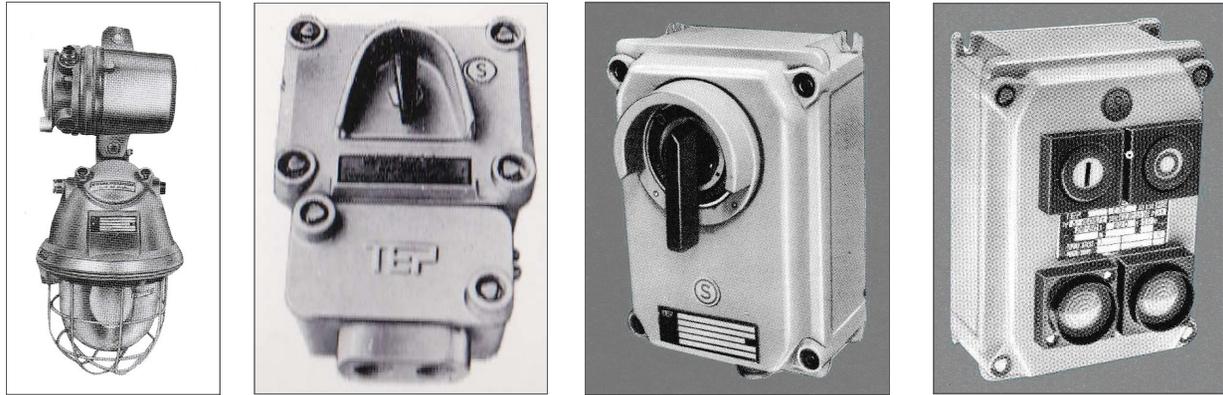

All of our products and systems for quality assurance are certified according to certification was carried out according to the **GOST TR CU** (Technical Regulation Customs Union) certificates are official documents certifying the conformity of the production with the standards of the Customs Union formed by Belarus, Kazakhstan and Russian Federation. The production process is conducted according to high standards of **ISO 9001** (Quality Assurance System) and **ISO 14001** (Environmental Management System), ensuring high quality products with constant care for environment.

Based on our long history in producing supreme quality explosion protected electrical equipment, we are ready to deal with every demand or specific requirement of our customers.

If you would need any additional information regarding our products or our company, we will be glad to answer your questions, with the professional approach from our Communication team.

Explosion protected products from the middle of the last century

Examples of today's Ex products

Ex LED light fittings

Following new trends in Ex lighting, and the advent of LED sources in explosive areas, TEPEX already in 2013. started production of Ex light fitting with LED light source (LED FLXE 118). Currently, several types of Ex certified LED lamps (pendant/max. 80W and linear LED lamps with 36W). The main advantages of LED lighting over conventional (mercury, fluorescent, metal-halide ...) lighting.

- *Durability*
- *Energy efficiency*
- *selectable color temperature*
- *environmentally friendly*

In 2017. we plan to start production of Ex pendant light fittings ~120W, and linear LED light fitting in GRP (Polyester) housing, Ex e type PSF 52 LED, PSF 28 LED.

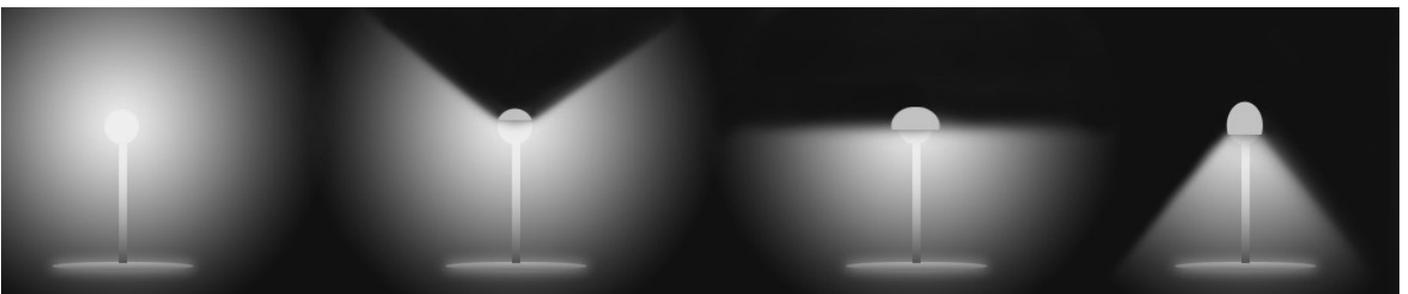

Ex LED

light fitting type PSF 52 LED

linear

Modern LED lighting has a significantly longer service life than conventional lighting, does not contain harmful compounds (mercury, cadmium ...), does not emit UV rays and releases significantly less heat energy.

When creating light-technical calculations it should be noted that the LED lighting (directional light) contribute to the reduction of light pollution of the atmosphere and losses on light scattering.

Explosive atmospheres occur when flammable gases, mist, vapors or dust are mixed with air. This creates a risk of explosion. The amount of a substance needed to create an explosive atmosphere depends on the substance in question. The area where this possibility exists is defined as a potentially explosive atmosphere.

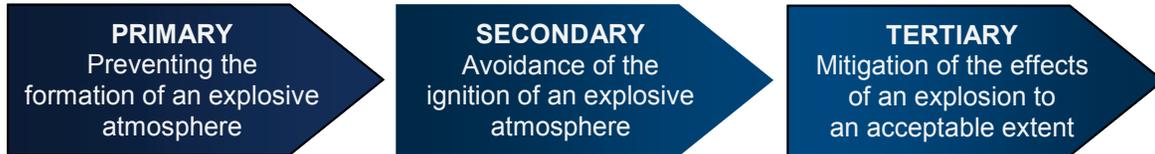

These atmospheres can be found throughout industries, from chemical, pharmaceutical, food, to power, and wood processing. The areas may also be known as "*hazardous areas*" or "*hazardous locations*."

GUIDE FOR EXPLOSION PROTECTION

Equipment and products operating in hazardous areas are required to meet stringent criteria. They must be “protected” to avoid the possibility of them becoming a source of ignition.

If the danger of explosion cannot be completely or only partly avoided by measures of preventing the formation of a hazardous explosive atmosphere, then measures must be taken that avoid the ignition of the explosive atmosphere.

Integrated explosion protection

Categories / Protection levels / Zones

AREAS	CATEGORIES	EPL	ZONES	EXPLOSIVE ATMOSPHERE
Mining - I	M1	Ma	/	>1,5% CH ₄
	M2	Mb		<1,5% CH ₄
Other than mines - II	1G, 1D	Ga, Da	0, 20	Continuously, long term or frequently

- 3 ... 2x Ex de adapters ADP 24 (for cable 6-15mm) through wiring

Rated voltage:

- 0 ... 24 V AC/DC
- 1 ... 60 V AC/DC
- 2 ... 110 - 127 V AC/DC
- 3 ... 220 - 240 V AC/DC

The lamp can operate with two types of connection:

a) Maintained (Dauerschaltung)

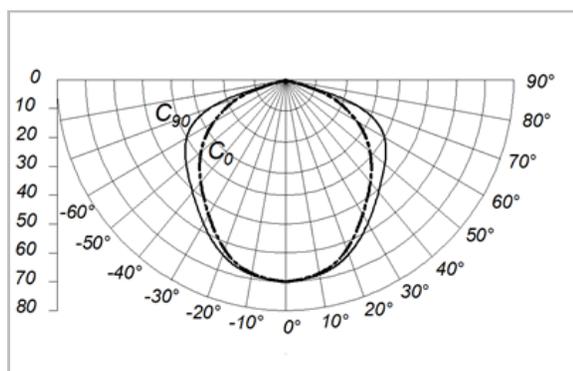

The light fitting can be used for general and orientation lighting with mains power supply via L' (installation switch). In case of voltage drop or an interruption in the mains power supply L, the light fitting will continue to operate in battery-powered mode, regardless of the status of installation switch L' (ON/OFF).

b) Non maintained (Bereitschaftschaltung)

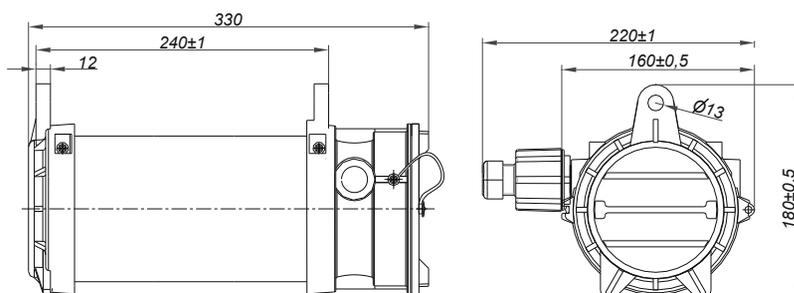

In case of voltage drop or an interruption in the mains power supply L, the light fitting will operate only in battery-powered mode.

In both types of the connection in the presence of continuous phase L, it is possible to verify the correctness of the emergency system by turning on the switch in the TEST circuit.

Allowed number of conductors per terminal	1x2.5-1.5 mm ²	1 x4-1.5 mm ²	1 x6-1.5 mm ²	1 x10-2.5 mm ²	1 x16-2.5 mm ²	1 x 25-6 mm ²	1 x 35-6 mm ²
Width of PE terminal [mm]	6	6	8	10	12	16	16
Width of final terminal [mm]	9						
Space for a terminal on DIN rail without end terminals	max. 140 mm						

- 1) Two conductors are connected on one terminal
- 2) PE conductors and jumpers are not taken in the calculation

It is possible to connect on one terminal smaller nominal cross-section conductors, but the maximum number of conductors and maximum current for the nominal wire size must be respected according to "Table of permitted installation". Combination of many different nominal cross-section terminals and conductors in one terminal box is allowed. Possible combinations are calculated on the basis of the "Table of permitted installation" so that the total maximum losses and the possibility of a physical installation is possible.

Control units

IP 66

SKX 12 ... SKX 15

- Enclosures made of glass-fibre reinforced polyester resin
- 4 basic enclosure sizes
- Alone or in various combinations of merged set
- Equipped with built-in devices
- ⇒ Control devices
- ⇒ Indicating lamps
- ⇒ Pushbuttons
- ⇒ Control switches
- ⇒ Ammeters

CONSTRUCTION

Enclosure: polyester plastic reinforced with glass fiber, color - black
Cover: with integrated thermoplastic elastomer gasket, closes with four M5/M6 stainless steel screws.

TECHNICAL DATA

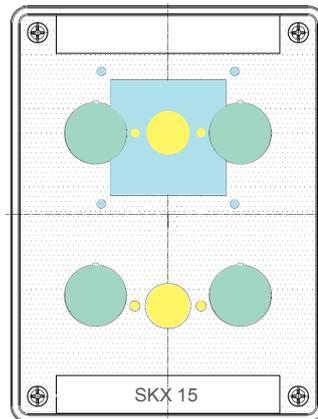

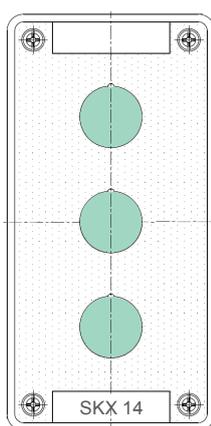

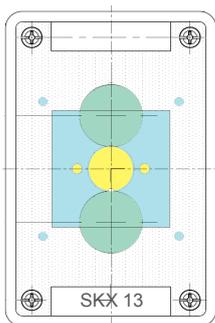

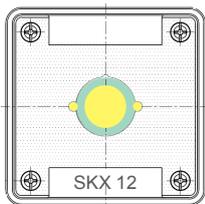

Certificate:	CESI 12 ATEX 017X, EXA 13 ATEX 0029, EAC RU C-HR.AB24.B.03291

SKX 16, 18, 20

CONSTRUCTION

Enclosure: polyester plastic reinforced with glass fiber, color - black
Stainless steel AISI 316L, brush finished, thickness 1.5mm

Cover: with integrated thermoplastic elastomer gasket, closes with four/six M5/M6 stainless steel screws.

TECHNICAL DATA

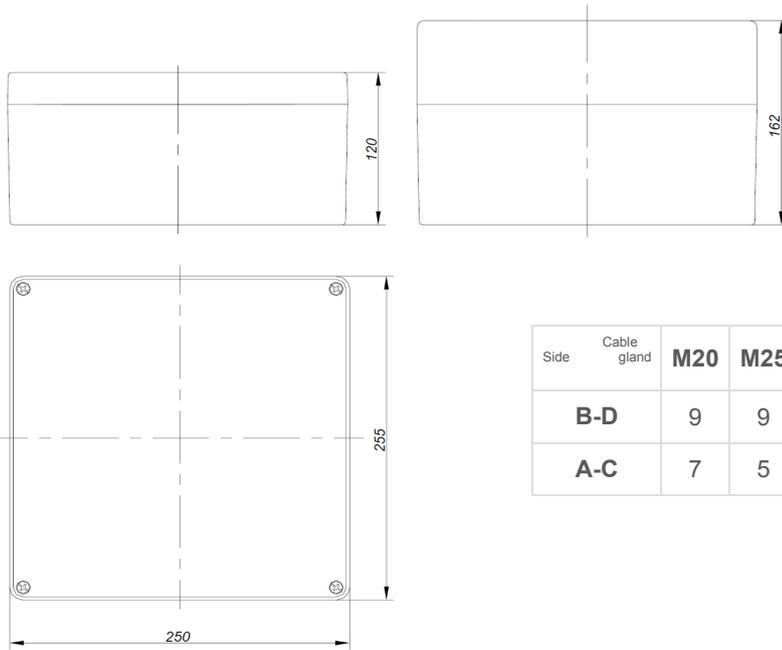

Certificate:	EXA 13 ATEX 0029, EXA 15 ATEX 0036 RU C-HR.AB24.B.03291, RU C-HR.AB24.B.03294
Marking:	CE 0722
Apparatus category:	II 2GD
Marking of explosion protection:	Ex d e mb ia/ib IIC T4...T6 Gb Ex tb IIIC T80°C Db
Ambient temperature ATEX: EAC:	-20°C ≤ T _a ≤ +50°C -50°C ≤ T _a ≤ +50°C
Degree of protection:	IP 66 category 1
Resistance to shock:	IK 08
Protection class :	I (protective earthing)
Rated voltage:	690 V AC (with mantle terminals block SL5, SL8 U _i = 400V AC)
Nominal current:	Up to 80 A
PE terminals (inside of the enclosure):	max. 2x4 mm ² +2x2,5 mm ² , 3x4 mm ² , 2x6 mm ²
Connection:	Depending on order requirements at the built-in components or at the terminal blocks. The rated operational voltage, the rated operational current and the rated cross-section depend on the terminal type used and the explosion protected components.

Control units SKX 16, SKX 18, SKX 20 are Ex combinations configured according to customer demand. Type designation consists of a basic type designation - SKX 16, SKX 18, SKX 20, "I" for enclosure made of SS AISI 316L and SRU number that represents the number of production and assigns to the increment.

Example: SKX 18 I / SRU -1280

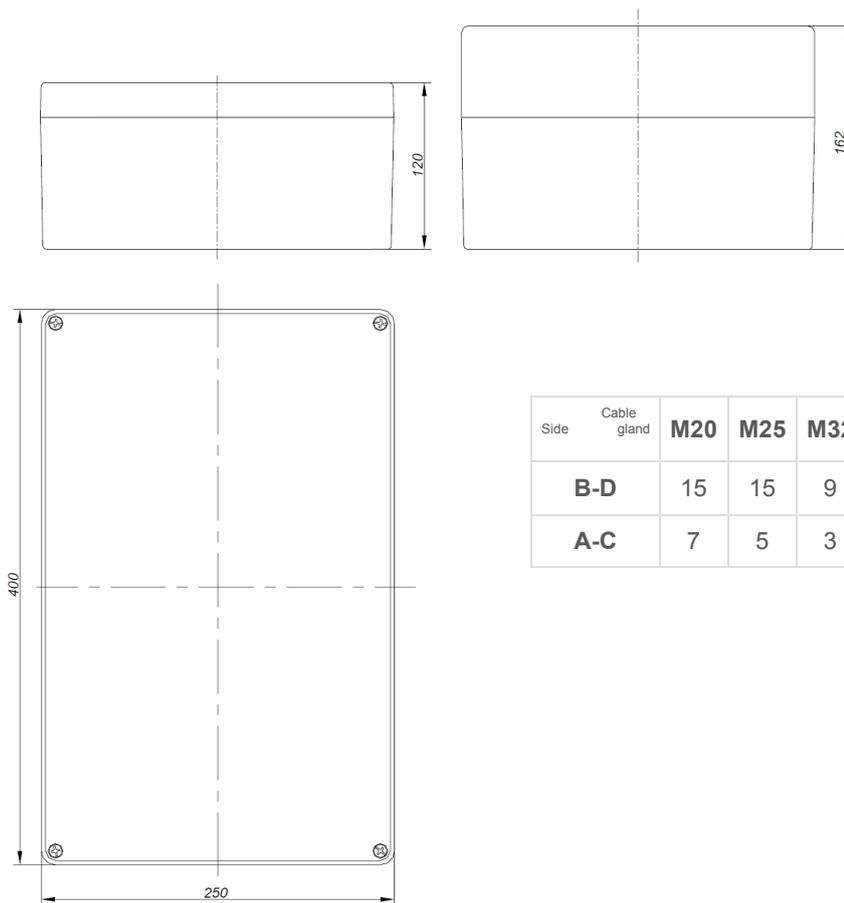

- ⇒ managing the combination of the housing **MMK 403016**
- ⇒ I - stainless steel enclosure AISI 316L
- ⇒ performed by production number **1280**

- Active grounding system for static grounding and permanent monitoring
- Permanent removal of electrostatic charge during filling or emptying tanks (road tracks, railcar tanks, barrels)
- Two output contacts

CONSTRUCTION

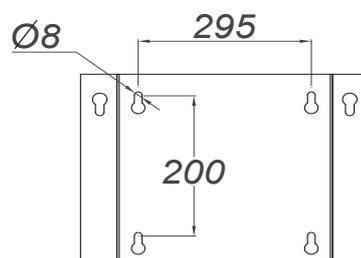

Enclosure: polyester plastic reinforced with glass fiber, color - black
 Cover: with integrated Thermoplastic elastomer gasket, closes with four M6 stainless steel screws.

TECHNICAL DATA

Certificate:	Ex CESI 11 ATEX 041, EAC RU C-HR.AB24.B.03293
Marking:	CE 0722
Apparatus category:	II 2G
Marking of explosion protection:	Ex de [ib] mb IIC T5 Gb
Ambient temperature ATEX:	$-20^{\circ}\text{C} \leq T_a \leq +50^{\circ}\text{C}$
EAC:	$-50^{\circ}\text{C} \leq T_a \leq +50^{\circ}\text{C}$
Degree of protection:	IP 66 category 1
Resistance to shock:	IK 08
Protection class :	I (protective earthing)
Rated voltage:	230 V \pm 10%
Rated current:	50 mA
Frequency:	50Hz
Output circuit:	2 NO/NC $U_n=250\text{VAC}$, $I_n=8\text{A} / 230\text{V}$, 4A at $\cos\phi=0.4$
Cable entry:	3 x M25 - power supply, two output circuit 4 x M25 - 2x connection clamp , 2x wire to equipotential busbar or grounding
Weight:	6 kg (without clamp and cable) weight of clamps with 10 m cable ca. 2,5 kg
Packing:	The packing contains: 1 pcs 430x350x230 mm

MOUNTING

Wall bracket with four screws

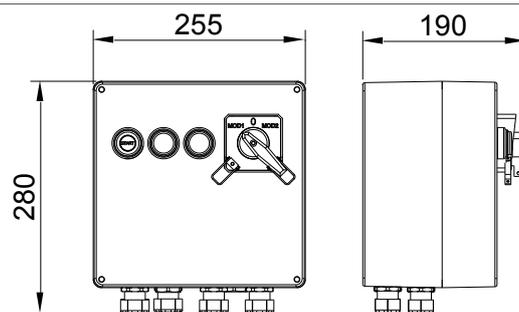

Grounding and grounding control device

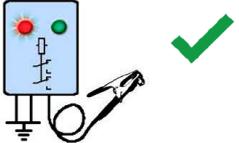

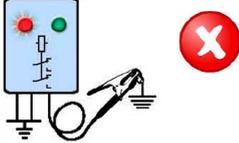

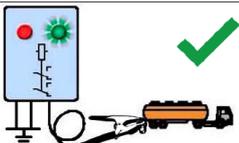

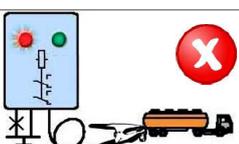

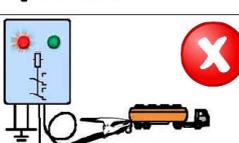

MODEL CODE

DIMENSION DRAWING (all dimensions in mm)

MODEL CODE	DESCRIPTION
GGCD-01/K1	Type with one a clamp K1 with 10m spiral cable
GGCD-01/K2	Type with two clamps K1 with 2x10m spiral cable

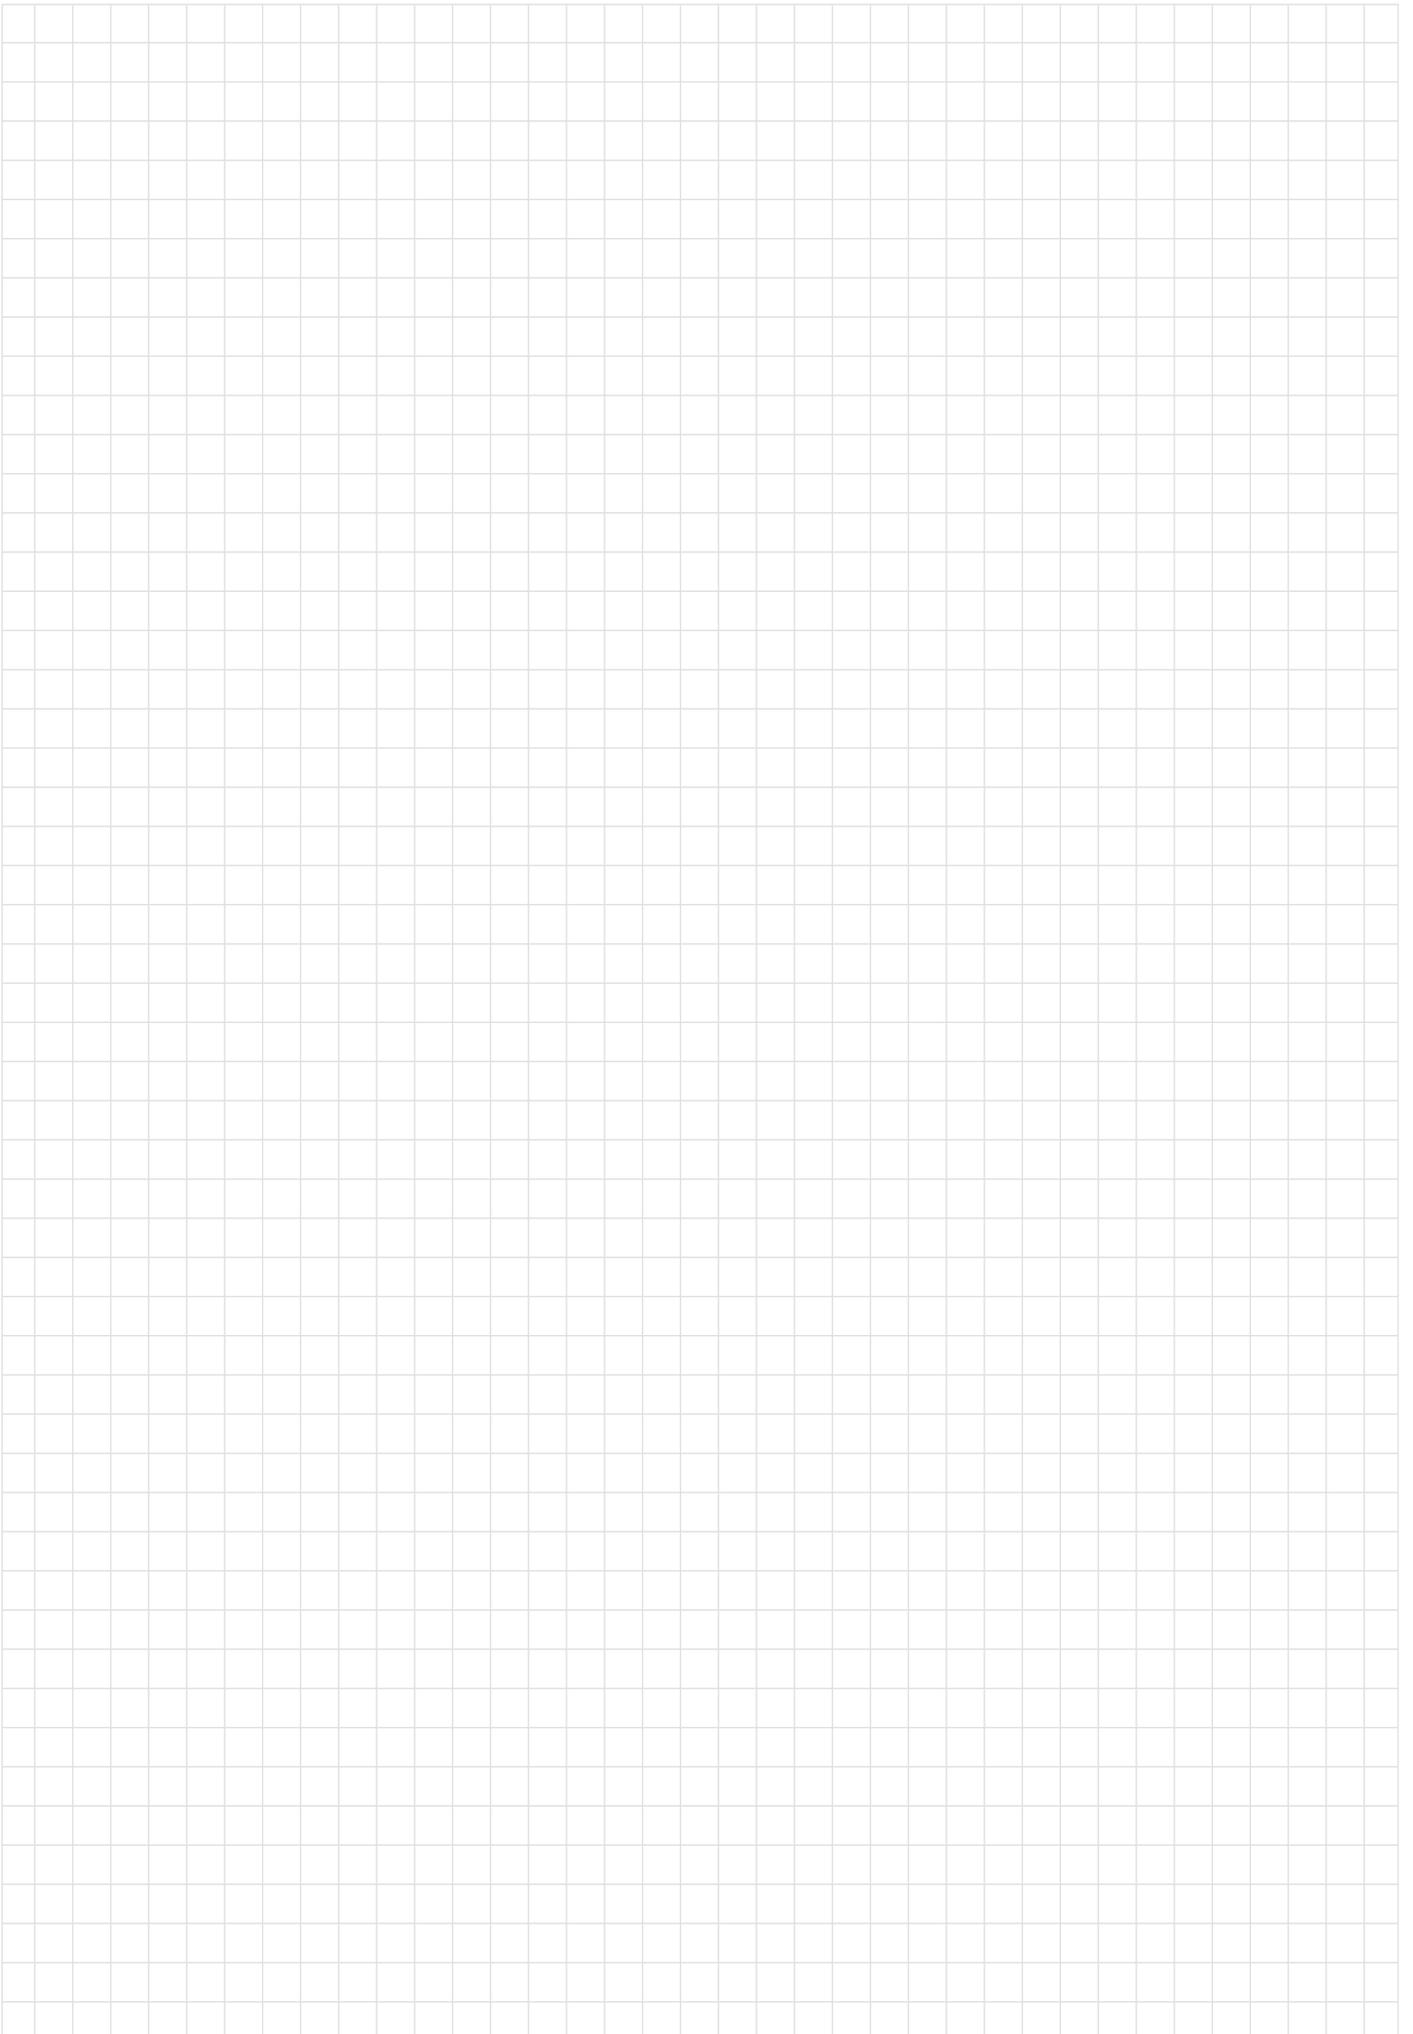

Principle of work for GGCD-01/..

State of earthing process		Reaction of the earthing monitoring device
	GGCD 01/K1 is not correct connected and turned ON. Clamp is not connected, grounding equipment not in use	Earthing incorrect • Red indicating lamp ON • Green indicating lamp OFF • Contact OPEN
	GGCD 01/K1 is correct connected and turned ON, but clamp is directly grounded, e.g. via the loading platform	Earthing incorrect (only MOD 2) • Red indicating lamp ON • Green indicating lamp OFF • Contacts OPEN
	GGCD 01/K1 is correct connected and turned ON. Clamp connected to tank vehicle.	Earthing OK • Red indicating lamp OFF • Green indicating lamp ON • Contacts CLOSED
	GGCD 01/K1 is correct connected and turned ON, but cable to the grounding is disconnected.	Earthing incorrect • Red indicating lamp ON • Green indicating lamp OFF • Contacts OPEN
	GGCD 01/K1 is correct connected and turned ON. Clamp connected to tank vehicle. Tank vehicle is grounded subsequently (e.g. via the loading arm).	Earthing OK • Red indicating lamp OFF • Green indicating lamp ON • Contacts CLOSED
	GGCD 01/K2 is correct connected and turned ON. Two clamps are connected on two separate object grounding.	Earthing incorrect • Red indicating lamp ON • Green indicating lamp OFF • Contacts OPEN
	GGCD 01/K2 is correct connected and turned ON. Two clamps are connected on one object grounding.	Earthing OK • Red indicating lamp OFF • Green indicating lamp ON • Contacts CLOSED

All technical data is relevant at the time of print.

An aerial photograph of a large offshore oil rig in the middle of the ocean. The rig is a complex of white metal structures, including a helipad on the left, various decks, and a large derrick. The water is a deep blue. A semi-transparent blue rectangular box is overlaid on the upper right portion of the image, containing white text.

Distribution cabinets Busbar enclosures

IP 66

IK 08

IM2

- Enclosure in sheet steel
- 5 basic enclosure sizes
- Enclosures can be combined (modular system)
- Available as empty enclosures or as completely fitted and wired control and distribution units
- For use in underground mines
- Cable entries available:

Direct : cable glands,

Indirect : via Ex e enclosure multiwire bushing, conductor insulator

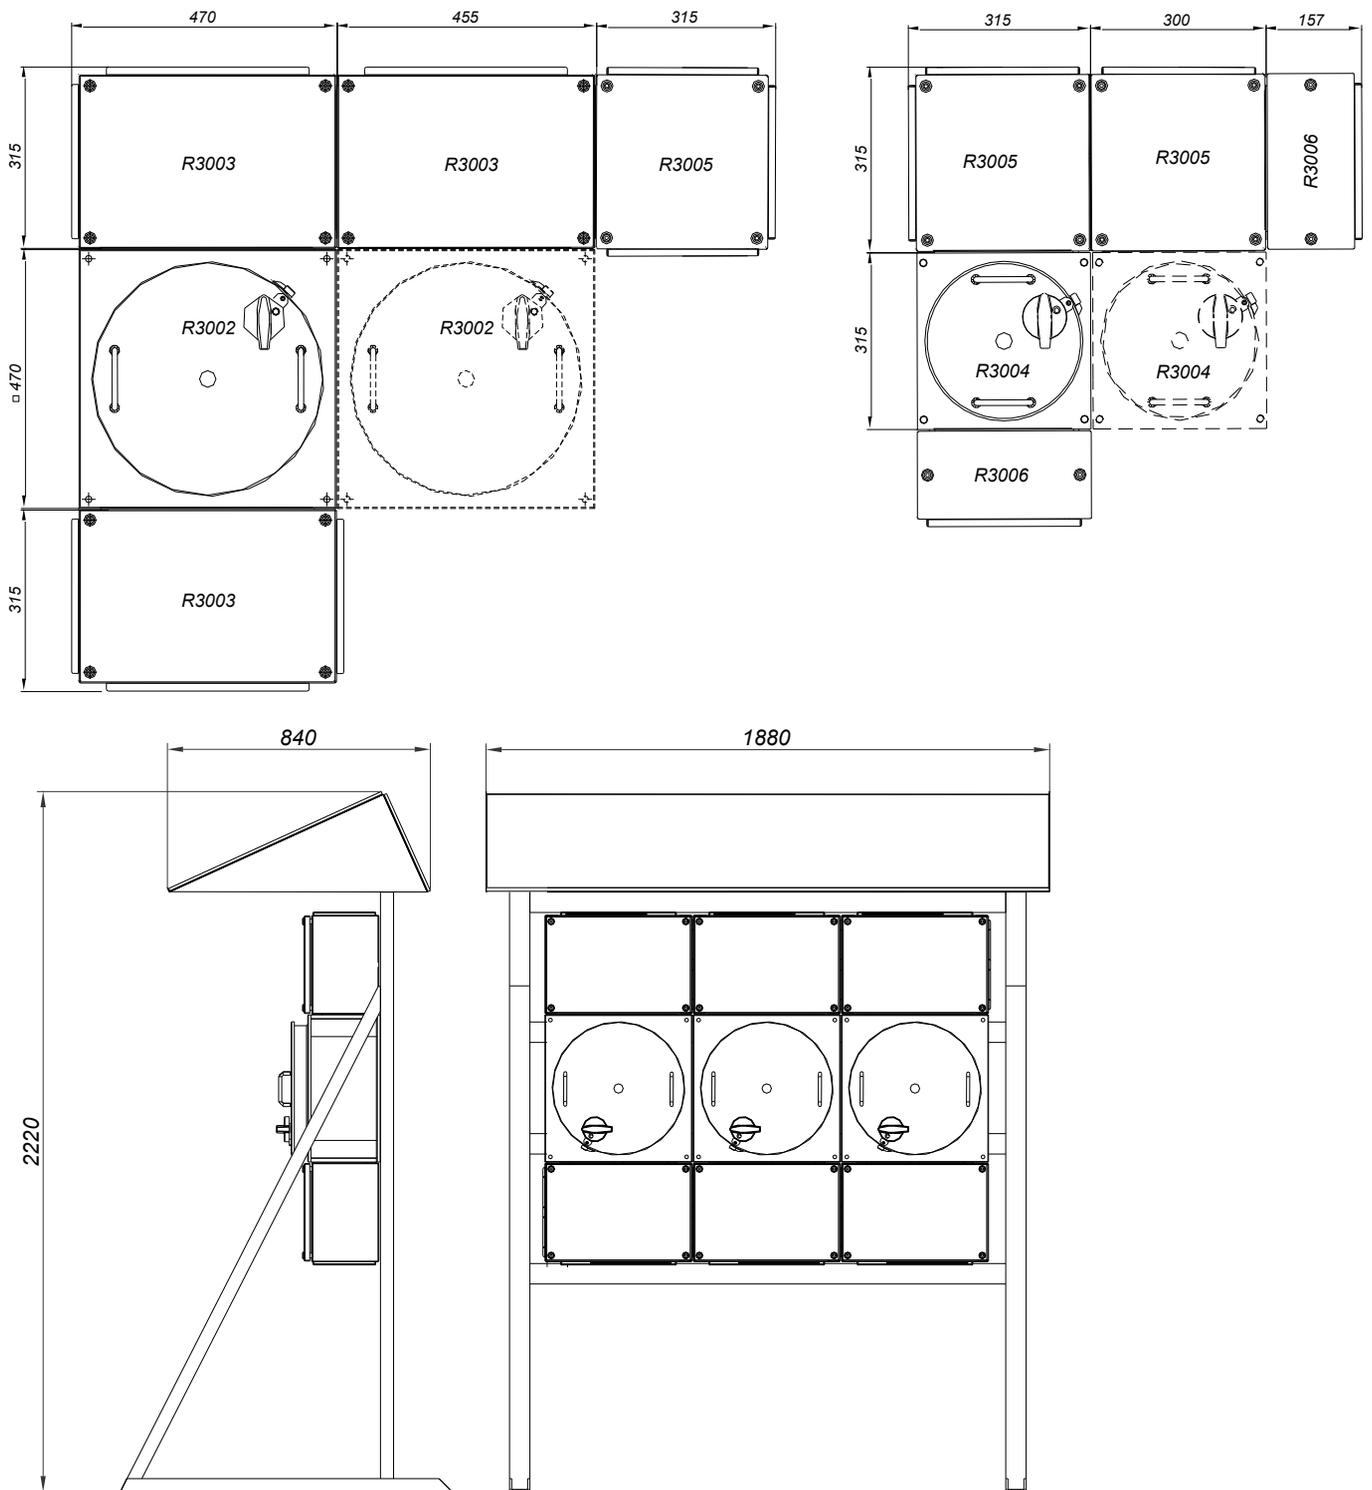

CONSTRUCTION

Enclosure: sheet steel (Exd enclosure 12mm thickness, Exe enclosure 3mm thickness)
Gasket: EPDM formed gasket

TECHNICAL DATA

Certificate:	EXA 14 ATEX 0050X, RU C-HR.AB24.B.03297
Marking:	0722
Apparatus category:	II 2G II 2D I M2
Marking of explosion protection:	Ex de I/IIC T6 Gb Mb Ex tb IIIC Db
Ambient temperature ATEX: EAC:	-20°C ≤ T _a ≤ +50°C -50°C ≤ T _a ≤ +50°C
Degree of protection:	IP 66 category 1
Resistance to shock:	IK 09
Protection class :	I (protective earthing)
Rated voltage:	Up to 690 V AC
Rated current:	Up to 500 A (depends upon built-in device)
Terminal cross-section:	240 mm ²
Weight:	
- Enclosure R3002	70 kg
- Enclosure R3003	18 kg
- Enclosure R3004	47 kg
- Enclosure R3005	15 kg
- Enclosure R3006	9 kg
Color:	Yellow, RAL1016 (other color on request)

DIMENSION DRAWING (all dimensions in mm)

Free-standing modular system with protection canopy

A distribution cabinets type R3002 and R3004 is made of steel with Ex d flameproof protection type. Closing of the cabinet is of threaded type and is protected against opening by lock switch, so that it can be opened only when it is not under voltage. The units is protected against corrosion by its painting inside and outside. Ex d steel enclosures (type R3002 and R3004) and Ex e sheet steel enclosures (type R3003, R3005, R3006) can be used as single enclosures and combinations.

The dimensions of the enclosures are so designed that they can be combined into a large modular unit. A large number of components, such as contactors, switches, instruments and PLCs can be built into these enclosures. Naturally, customer-supplied equipment can also be incorporated into the layout. The equipment layout is designed by us to customer's requirements. Cable entry is either direct (cable glands or conduit entries) or indirect via an Ex e enclosures type R3003, R3005, R3006.

The "flameproof" type protection 'Ex d' is based on the principle that electrical components which may cause sparks or arcing in normal operation (switches, contactors etc.) are in an enclosure constructed so that it will contain an explosion of flammable gas or vapor and will not permit ignition of a surrounding explosive atmosphere. Further, the temperature of the outside surface of the enclosures must not exceed the prescribed temperature limit for the appropriate temperature class. That means, the heat loss from the components fitted must not exceed a specified value.

Data required for the layout of control and distribution boards

We produce distribution cabinets accordint to customer requirements and basis to the project data:

- the required minimum type of protection
- as appropriate, details of the hazardous atmosphere for which the equipment must be suitable
- single line or wiring diagram
- schematic for control systems
- operating, auxiliary and control voltages
- frequency
- power and current ratings of connected loads
- quantities and types of components required, e.g. contactors, switches, circuit-breakers, fuses, thermal relays, instruments, terminals etc
- quantity and types of cables
- number and size of conductors
- quantity and location of entries (from top, bottom, side, centre)
- environmental conditions
- method of installation

TYPE OF INSTALLATION

A) temporary

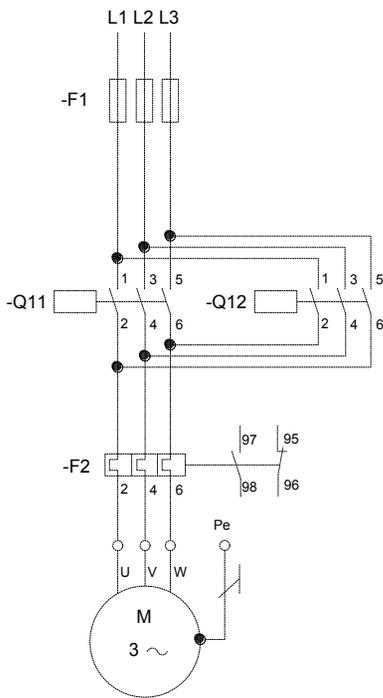

B) wall-mounted

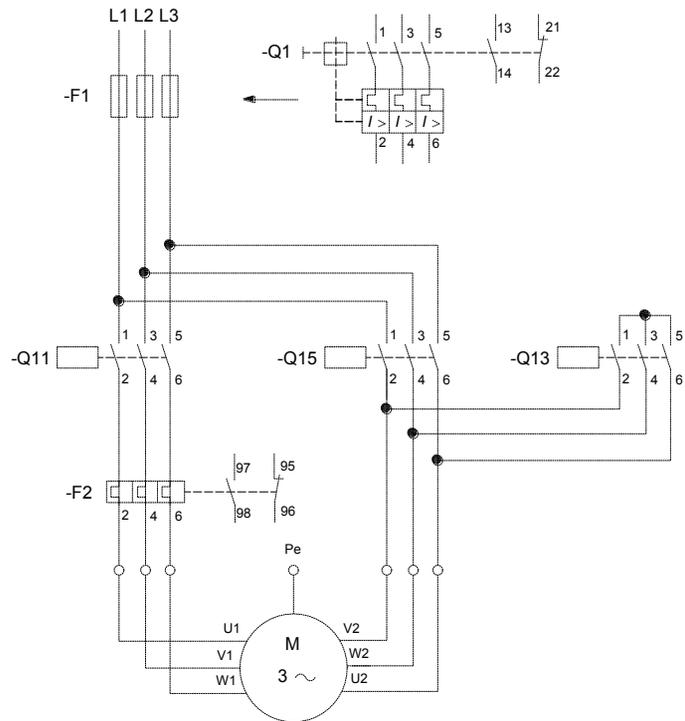

C) free-standing
With or without protection canopy

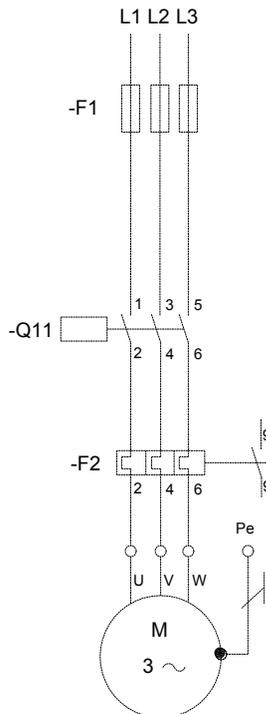

Examples of wiring diagram for distribution cabinets

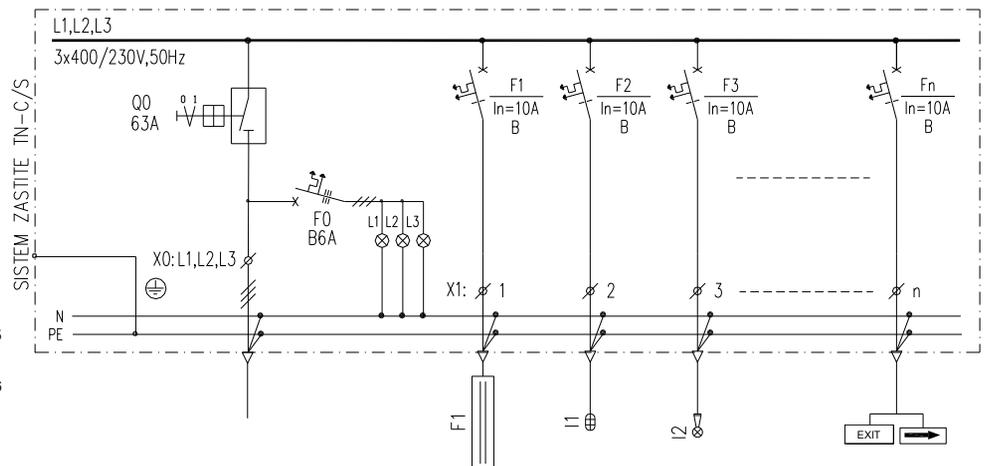

A) Direct on line start of three phase motor;
two directions of rotation

B) STAR-DELTA switching of three phase motor

C) Direct on line start of three phase motor

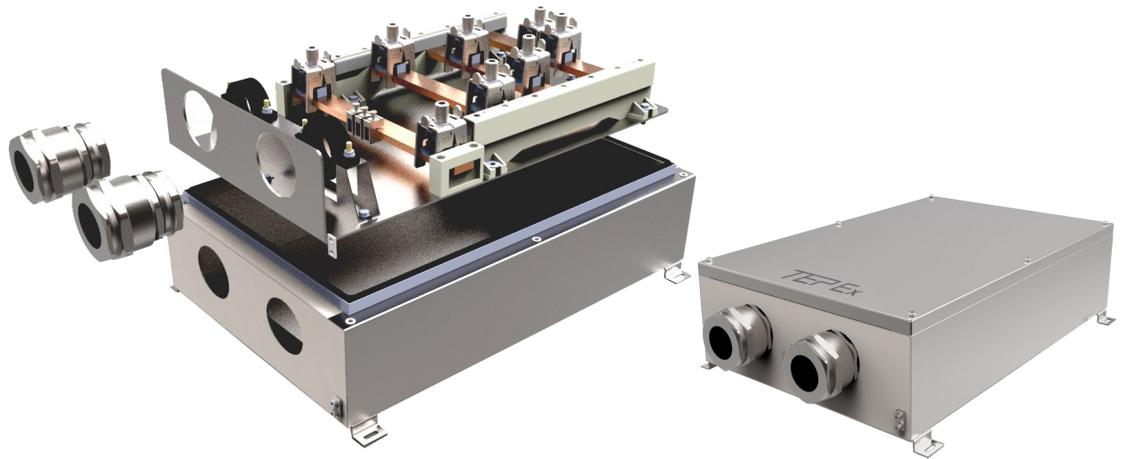

D) Light fittings control panel

IP 66

IK 08

- For electrical connection between Exd and Exe enclosure without usage of the special Ex d cable glands
- Multi-core bushing with external thread M 20 or 1/2 " NPT and mounted connection terminals designed in type of protection increased safety "e".

**CONSTRUCTION**

Enclosure: PA cover
Multi-core bushing: brass nickel plated (SS AISI 316 on special request)

TECHNICAL DATA

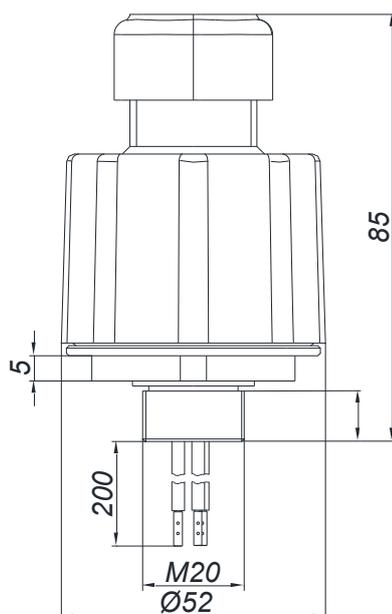

Certificate:	EXA 14 ATEX 0043U
Marking:	0722
Apparatus category:	II 2G II 2D
Marking of explosion protection:	Ex d e IIC Gb Ex tb IIIC Db
Service temperature:	-20 °C ≤ T _{service} ≤ +60 °C
Degree of protection:	IP 66 category 1
Resistance to shock:	IK 08
Protection class :	I (protective earthing)
Rated voltage:	400V
Rated current:	16 A
Connection terminal :	L1, L2, L3, N, PE , 2 x max.2,5 mm ²
Cable gland:	For cable φ6-15 mm

MODEL CODE
